As technology changes the way we transport people and goods, key stakeholders inevitably need to navigate new risks, alongside new opportunities. With vehicles as the next ‘connected device’, concerns relating to operating systems, patents, privacy, data transfer, connectivity, cybersecurity, encryption and services proliferate dramatically, bringing an escalation in regulation, enforcement and litigation.

Equally, with increased momentum behind efforts to wean mankind off the combustion engine and promote cleaner energies, fewer emissions and electric charging, a multitude of risks and exciting opportunities are emerging in the energy sector.

Always at the forefront of global reporting on regulatory risk, MLex boasts comprehensive, forensically-detailed coverage of the two major trends which are shaking up transport and related industries: digital transformation and the energy revolution.

Get the complete picture
As the key trends shaping the future of Mobility cut across different areas of regulation already expertly covered by our specialist journalists (data privacy and security; energy & climate; antitrust; mergers & acquisitions and more), MLex saves you research time by joining the regulatory dots across these spheres, as well as across the globe.

Build your risk strategy
With longstanding expertise in defining regulatory risk as it emerges, and a team including journalists devoted solely to Future Mobility reporting, MLex delivers exclusive insight into how businesses will be impacted by the transformations in tech and energy—often ahead of other news outlets.

Spot business opportunities
As well as enabling you to side-step risk, MLex’s Future Mobility coverage allows you to identify and nurture new business opportunities in a rapidly evolving operating environment.

Don’t just take our word for it ... Check out highlights from our Future Mobility coverage here: https://mlexmarketinsight.com/news-hub/editors-picks/future-mobility.
Antitrust As a leader in antitrust news across the globe, our experts deliver exclusive, forward-looking scoops on cartels, probes into restrictive practices, policy changes and related litigation. Our deep coverage provides behind-the-scenes information you can't get anywhere else.

Data Privacy & Security Get the insight your business and clients need to navigate constantly evolving data privacy and security laws and regulations across the globe.

Energy & Climate Change Track major energy and environmental policy developments, including regulation of the power industry, security of energy supply, climate change, alternative energy, consumer needs and technical innovation.

Financial Crime In addition to comprehensive coverage of anti-bribery and corruption laws, probes and litigation, MLex closely follows and reports on financial crime within the banking industry, including anti-money laundering, insider trading, fraud and market manipulation.

Financial Services Our EU and US experts report on the regulatory bodies that set global standards as well as regional rulemaking, implementation and enforcement in the areas of derivatives, trading & securities, investment & retail banking, asset management, payment services and credit-rating agencies.

Mergers & Acquisitions Be the first to know of merger developments and receive unique insight from MLex M&A experts on the review process, procedural steps and court litigation resulting from approved or blocked deals.

State Aid Advise your business and clients on aid schemes that will be compliant with the law by following MLex coverage on EU investigations and policy changes regarding support offered by EU governments to companies and sectors.

Tech & Telco MLex closely follows changes to regulation impacting Internet platforms, global connectivity and media rights.

Trade With a focus on the major trade centers (the EU, US, UK and their trade relationships with other nations), MLex tracks global trade negotiations, changing trade policies and trade disputes and enforcement, including anti-dumping, anti-subsidy and safeguard probes.
